

TYPE KA NG LAMOK, MAGING SINO KA MAN

P10,000
medical cash assistance

diagnosis only
outpatient or
hospitalization covered

P350 only
for 1 year cover

What is M Pioneer MediCash Dengue Insurance?

It is health insurance that provides a lump-sum of P10,000 medical cash assistance in the event that the insured is diagnosed with Dengue, even if the diagnosis does not require hospital confinement.

How do I get the P10,000 benefit?

Once you're insured, over the 15-day waiting period, and start feeling the symptoms and showing signs of Dengue, you should:

- Consult a Doctor.
- Ask the Doctor to complete the Claims Medical Report (CMR), which is like a Medical Certificate and comes with your MediCash Coverage Summary.
- Take a photo of the CMR and the diagnostic results.
- Send photo via email to mpioneer.claims@pioneer.com.ph or Viber to 0917 829 1301

Can someone who has Dengue buy MediCash and claim the P10,000?

No. MediCash has a 15-day waiting period which means that no signs nor symptoms of Dengue should have been observed and that the first doctor's consultation should not have occurred during the waiting period.

Who would benefit from MediCash?

You, your family members, friends, and household staff, with ages 14 days old up to 70 years old.

I already have an HMO and/or Philhealth, is there still value in getting MediCash?

Yes, there is. You get the full P10,000 on top of your HMO and Philhealth benefits to take care of all the other expenses. Receipts or hospital bills are not required.
